

Buy a Domain Name & Forward it to your website in a few steps...

After reading or printing this step-by-step, [click here](#) to get started.

1) Buy a domain name

1. Search for a Domain Name that is available

The screenshot shows the homepage of a domain registration service. At the top, there is a logo with a blue diamond shape and the text "DomainNameRegistration" and "Easy & Affordable". Below the logo is a navigation menu with links for "Home", "Domain Names", "Web Hosting", "SSL Certificates", and "Email Accounts". There are also links for "My Account" and "FAQ".

The main content area features a large image of a woman with her arms crossed. To the right of the image, the text reads "Domain Names" and ".COMs starting at \$19.95!*". Below this, it says "FREE with every domain: [See Details](#)". A list of free services is provided:

- **FREE!** Economy Email
- **FREE!** Forwarding / Masking
- **FREE!** Change of Registration
- **FREE!** Starter Web Page
- **FREE!** "For Sale"/ Parked Page
- **FREE!** Domain Name Locking
- **FREE!** Status Alerts
- **FREE!** Total DNS Control
- **FREE!** 100 Email Forwards

To the right of the list is a red button with a white dollar sign and the text "COMPARE OUR PRICES!". Below the button is a link that says "Click Here!".

At the bottom of the page, there is a blue box with the text "Start Your Domain Name Search Here!". Below this text is a form with the label "Enter a Domain Name:". The form contains a text input field with "www." on the left, a dropdown menu with ".com" selected, and a "Search" button. The entire search bar area is circled in red.

Registration and Checkout Options

1. Choose a Public or Private Registration.

Protect yourself from spam, scams, prying eyes and worse!

With a **standard public registration**, your name, phone number, postal and email address are listed in the public WHOIS directory. Your personal information is available to anyone, anytime -- exposing you to an untold number of potential problems. And yes, it can happen to YOU. But a **private registration shields your personal information from public view**; you control who reaches you and when!

A Private "Unlisted" Registration protects you from:

- ▶ Domain-related spam
- ▶ "Moonlighting", home- or side-business identity disclosure
- ▶ Identity theft and fraud
- ▶ Privacy intrusions
- ▶ Harassers, stalkers, and data miners

3. Click on **Forwarding** next to your domain name

The screenshot shows the 'MANAGE DOMAINS' interface. At the top, there's a navigation bar with links like Home, Domain Names, Web Hosting, etc. Below that, a user greeting 'Hello, Mary Jones!' is visible. The main section is titled 'MANAGE DOMAINS' and contains several buttons: Manage Contacts, Change Account, Cancel Domains, Set Nameservers, Auto Renew, Renew Domains, Set Locking, Forward Domains, and Add Privacy. A 'Bulk Edit' button is on the left, and a 'Lock all Domains' button is on the right. Below these is a 'Filter Domain List' section with a table of domains. The table has columns for checkboxes, domain names, 'Forward To', 'Masked', and 'Free Offers'. One domain, 'FIRSTDOMAINNAMEREGIS TRATION.COM', is checked, and its 'Forwarding' link is circled in red. To the right of the table, there are instructions for managing domains.

To manage an individual domain name, click on that domain name.

Managing Multiple Domains
There are two ways to manage more than one domain name:

1. Check the boxes to the left of each domain name that you want to manage, and use the buttons above the domain list to edit them.
2. Click the "Bulk Edit" button located above the domain list. There you'll be able to quickly edit all or a majority of your domain names at one time.

4. **Forward/Mask information:** Complete the information requested on the right hand side.

The screenshot shows a web interface for managing domains. The main heading is 'MANAGE DOMAINS'. Below it, there are several tabs: 'Bulk Edit', 'Manage Contacts', 'Change Account', 'Cancel Domains', 'Lock all Domain', 'Set Nameservers', 'Auto Renew', 'Renew Domains', 'Set Locking', 'Forward Domains', and 'Add Privacy'. The 'Forward Domains' tab is active, showing a table with domain names and their forwarding status. The domain 'FIRSTDOMAINNAMEREGISTRATION.COM' is selected, and its configuration is shown on the right. The configuration includes options for 'Apply changes to' (Single Domain or Entire Account), 'Forward To' (a URL), 'Mask Domain' (checked), 'Masked Title', 'Masked Description Meta-Tag', and 'Masked Keyword Meta-Tag'. At the bottom, there are buttons for 'Remove Forwarding', 'Save Changes', and 'Cancel Changes'.
